Paragraphs

MEEMURE VILLAGE CAMP offers guests an opportunity to experience what it is like to live in the ancient isolated village of Meemure. The village is situated deep in the Knuckles Wilderness, where the local people have maintained their traditional and cultural attitudes towards the forest's existence. They rely heavily on the forest for their survival and gain as much as 63% of their total income from the forest resources.

One of the most unbelievable aspects of the remote village of Meemure is the fact that it is completely isolated and has no forms of communication whatsoever. There are no telephone lines – even to the nearest city of Hunnasgiriya, some 29km.

Meemure is a village in Sri Lanka with a population of about 400.It is located near the border between Kandy District and Matale District in the Knuckles Mountain Range. Meemure is one of the most remote villages in Sri Lanka with the only access via a 14 km (8.7 mi) trail from the town of Loolwatte.There is no cellular service available in the village,but a CDMA telephone service is available. There is no direct mail delivery to the village; a villager journeys each day to Thapal Junction to exchange incoming and outgoing postal mail with a postman.
